HearIt Mobile

HearIt Mobile is a hands-free, neck loop solution for amplifying sound from Bluetooth mobile telephones. HearIt Mobile is specially designed for you if you have a hearing loss but want to use your mobile hands-free – without compromising sound quality.

Versatile solution

You can benefit from using HearIt Mobile in many different situations, and whenever you need to amplify the sound of your mobile telephone: When you are home, at work, in your car, and so on.

Multiple applications

You can use HearIt Mobile together with your hearing aid's built-in telecoil or with headphones.

Heart Mobile

Amplification of sound from Bluetooth mobile telephones

Listen to conversations on your mobile, clearly and distinctly. Heart Mobile amplifies the sound from your Bluetooth mobile telephone so that you can also talk on the telephone in situations with high background noise. The sound from your mobile is transmitted wirelessly to Heart Mobile, and you hear it clearly and distinctly in your hearing aid or headphone.

Exclusive and hands-free

Using a portable neck loop, Heart Mobile offers you secure, hands-free use of your mobile telephone. You can easily take it with you when you are on the move and need to talk on your mobile. Heart Mobile has a handsome, exclusive and particularly user-friendly design.

Many useful functions

Heart Mobile provides you with many functions including:

- Calls can easily be answered and ended by means of a single pushbutton.
- Volume button for regulating loudness.
- Volume indicator.
- Bluetooth indicator for showing whether there is Bluetooth connection to the mobile telephone.
- Battery indicator – lights red when recharging is necessary.
- Safety opening on neck loop.
- Personal code for Bluetooth connection so others cannot listen in.

Rechargeable battery

Heart Mobile features a built-in rechargeable battery.

Heart Mobile package

Heart Mobile is supplied together with charging cord.

-It's that simple!
